PROFILE

Recent MSc Business Data Science graduate (Aalborg University, June 2026) with hands-on experience in Python, data pipelines, automated data collection and web scraping, machine learning, forecasting, NLP, and LLM-assisted analysis. Built and deployed a self-updating news-analysis platform (master's thesis) that scrapes and scores 6,500+ articles through daily automated workflows and LLM-based bias analysis, served in a live Streamlit app. An academic focus on data governance and structuring complex datasets, backed by five years of owning operational databases, keeps insights accurate, consistent, and decision-ready.

EDUCATION

MSc in Business Data Science | Aalborg University, Denmark

Sep 2024 – Jun 2026

- **Master's thesis:** AI-assisted media bias detection using NLP and LLM-based analysis (see Selected Projects).
- Key coursework: applied machine learning, NLP & network analysis, deep learning & AI, data-driven business modelling, data governance & ethics, data engineering & MLOps.

Bachelor of Business Administration (BBA) | University of Dhaka

Jan 2014 – Dec 2017

- **Major:** Management Information Systems
- Coursework: data-driven decision-making, information systems, business strategy, and leadership.

PROFESSIONAL EXPERIENCE

Assistant Manager | V. A. Transport Agency

Jan 2022 – Jun 2024

- Owned the company's operational databases end-to-end, safeguarding the accuracy and consistency of the data behind every team's reporting.
- Built recurring dashboards and reports that became management's standard basis for day-to-day logistics decisions.
- Analysed operational data to surface inefficiencies, and partnered with cross-functional teams to streamline scheduling and workflows.

Senior Officer | V. A. Transport Agency

Mar 2019 – Dec 2021

- Maintained operational records and service data supporting planning, follow-up, and cross-team communication.
- Coordinated transport operations, customer communication, and documentation; drove improvements to reporting processes.

Part-Time Sushi Chef | Karma Sushi Aalborg & Catch Sushi Bar

Jan 2025 – Jun 2026

- Balanced kitchen work with full-time studies, building time management, quality control, and composure under pressure in a Danish work environment.
- Coordinated with team members and helped onboard new staff during high-volume service periods.

SELECTED PROJECTS

AI-Assisted Media Bias Detection in Geopolitical News | Master's Thesis

2025 – 2026

Live app: bias-detector.streamlit.app | GitHub: [RakibHasan221b/Bias-Detector](https://github.com/RakibHasan221b/Bias-Detector)

- Built an end-to-end Python NLP/LLM pipeline that collects, cleans, and analyses geopolitical news coverage across multiple international outlets.

- Maintains a continuously updating corpus of 6,500+ articles through daily GitHub Actions workflows and source-specific scrapers (BBC, The Guardian, Daily Star, New Age).
- Engineered a Pandas cleaning pipeline handling deduplication, mixed date parsing, and topic classification across heterogeneous sources.
- Combined TF-IDF retrieval with GPT-4o analysis to score framing, selection/omission, sourcing, and tonal bias; findings are surfaced in an interactive Streamlit app.

Restaurant Guest Forecasting | *Karma Sushi Aalborg*

2025

GitHub: [RakibHasan221b/Karma-Prediction](https://github.com/RakibHasan221b/Karma-Prediction)

- Built forecasting models predicting daily guest numbers for a working restaurant, supporting staffing and purchasing decisions.
- Combined historical guest data with weather and local-event factors; owned the full workflow: cleaning, EDA, feature engineering, modelling, and evaluation (Python, Pandas, Scikit-learn).

ADDITIONAL PROJECTS

- **Salary Analysis & Tax Calculator:** Streamlit app for gross/net income, tax deductions, holiday pay, and monthly earnings tracking (Python, Pandas). [Live app](#)
- **CO2 Emissions Forecasting (Energy Sector):** group MLOps project predicting energy-sector emissions; focus on model training, evaluation, and deployment (Python, Scikit-learn, Streamlit).
- **Customer Service Chatbot:** NLP chatbot for order status, payment confirmation, and refund-policy support (Python, Ollama, LangChain, SentenceTransformers, Streamlit).

TECHNICAL SKILLS

- **Programming & Data:** Python (Pandas, NumPy), SQL (foundational, actively developing), data cleaning & preprocessing, feature engineering
- **Machine Learning & AI:** Scikit-learn (regression, classification, time-series forecasting); NLP; LLM workflows (prompt engineering, RAG, LangChain, Ollama)
- **Visualisation & Reporting:** Matplotlib, Seaborn, Streamlit dashboards, Microsoft Excel (pivot tables), management reporting
- **Data Collection & Automation:** Requests, BeautifulSoup, Playwright, trafilatura, web scraping, GitHub Actions (CI & scheduled workflows)
- **Languages:** English (fluent), Danish (beginner, actively learning)

VOLUNTEERING & LEADERSHIP

- **Volunteer:** Cross-Cultural Trainers (CCT) & International Cultural Youth Exchange (ICYE), Denmark: community and intercultural engagement (2025 – present)
- **Buddy, International Buddy Program:** Aalborg University – supported international students adapting to university life, Sep 2025 – Feb 2026. [Certificate](#)
- **Student leadership:** General Secretary, MIS Hub 71; Organizing Secretary, MIS Debating Club; Head, MIS Cultural Wing.
