PROFILE

Recent MSc Business Data Science graduate from Aalborg University, June 2026, with five years of prior operational and data management experience, now backed by hands-on training in machine learning, NLP, and LLM-based analysis. Built and deployed a full-stack AI travel-planning platform for Denmark, combining a RAG pipeline, a multi-agent LLM system, and a trained ML model, live end-to-end across a FastAPI backend, PostgreSQL/pgvector database, and Streamlit frontend. Comfortable moving between high-level analysis and hands-on technical execution, with a track record of turning messy operational data into decision-ready reporting that management relied on daily.

TECHNICAL SKILLS

- **Programming & Data:** Python (Pandas, NumPy), SQL, Git/GitHub version control, data cleaning & preprocessing, feature engineering, ETL/ELT data pipelines, data governance, data quality, data validation, FastAPI, PostgreSQL (pgvector, vector search)
- **Machine Learning & AI:** Scikit-learn (regression, classification, time-series forecasting, evaluation metrics), statistical analysis, MLflow, Optuna, XGBoost, LightGBM, PyTorch, TensorFlow, Docker, NLP, LLM workflows (prompt engineering, RAG, LangChain, Ollama, Groq), agentic systems (CrewAI, multi-agent orchestration)
- **Visualisation & Reporting:** Matplotlib, Seaborn, Streamlit dashboards, Microsoft Excel (pivot tables), management reporting, business intelligence, KPI reporting, stakeholder management
- **Data Collection & Automation:** Requests, BeautifulSoup, Playwright, trafilaturo, web scraping, GitHub Actions (CI & scheduled workflows), cloud deployment (Render)
- **Languages:** English (Fluent), Danish (Beginner)

SELECTED PROJECTS

AI Travel Assistant Denmark | *Personal Project*

2026

- Built and deployed a full-stack AI travel-planning platform for Denmark, combining a FastAPI backend, PostgreSQL/pgvector vector database, and a Streamlit frontend, live on Render and Streamlit Community Cloud.
- Engineered a RAG pipeline with semantic search (sentence-transformer embeddings, HNSW indexing) over 1,468 real places sourced from OpenStreetMap, generating GPT-4o-grounded summaries for 175 of them.
- Built a CrewAI multi-agent trip-planning system (Place Scout, Conditions Analyst, Concierge agents) powered by Groq's Llama 3.3, integrating live weather forecasts into recommendations.
- Trained and tuned an XGBoost quality-scoring model with Optuna and MLflow, evaluated against a custom tolerance-based accuracy metric.

AI-Assisted Media Bias Detection in Geopolitical News | *Master's Thesis*

2025 - 2026

- Built and shipped an end-to-end Python NLP/LLM pipeline that collects, cleans, and analyses geopolitical news coverage across four major international outlets (BBC, The Guardian, Daily Star, New Age).
- Grew and maintained a continuously updating corpus of 6,500+ articles in a SQLite database, with automated deduplication, mixed-date parsing, and topic classification across heterogeneous sources, refreshed daily via GitHub Actions.

- Combined TF-IDF retrieval with GPT-4o analysis to score framing, selection/omission, sourcing, and tonal bias, surfacing findings through an interactive Streamlit app.

Restaurant Guest Forecasting | Karma Sushi Aalborg

2025

- Built and evaluated forecasting models predicting daily guest numbers for a working restaurant using historical guest, weather, and local-event data, owning the full workflow end-to-end, cleaning, EDA, feature engineering, modelling, and evaluation (Python, Pandas, Scikit-learn), directly informing staffing and purchasing decisions.

EDUCATION

MSc in Business Data Science | Aalborg University, Denmark

Sep 2024 - Jun 2026

- Master's thesis: AI-assisted media bias detection using NLP, LLM-based analysis, and a SQL (SQLite) backend (see Selected Projects).
- Key coursework: applied machine learning, NLP & network analysis, deep learning & AI, data-driven business modelling, data governance & ethics, data engineering & MLOps.

Bachelor of Business Administration (BBA) | University of Dhaka

Jan 2014 - Sep 2018

- **Major:** Management Information Systems
- Coursework: data-driven decision-making, information systems, business strategy, and leadership.

PROFESSIONAL EXPERIENCE

Assistant Manager (Data & Reporting) | V. A. Transport Agency

Jan 2022 - Jun 2024

- Owned the company's operational databases end-to-end, safeguarding the accuracy and consistency of the data behind every team's reporting.
- Built and maintained the recurring dashboards and reports that became management's standard basis for day-to-day logistics decisions, replacing ad hoc, manually assembled updates.
- Analysed operational data to surface inefficiencies and partnered with cross-functional teams to streamline scheduling and workflows, reducing recurring planning errors and delays.

Senior Officer | V. A. Transport Agency

Mar 2019 - Dec 2021

- Maintained operational records and service data, coordinated transport operations and customer communication, and drove process improvements that made reporting faster and more consistent.

Part-Time Sushi Chef | Karma Sushi Aalborg & Catch Sushi Bar

Jan 2025 - Jun 2026

- Balanced kitchen work with full-time studies and thesis research, maintaining quality control and composure under pressure while coordinating with and onboarding team members during high-volume service.

ADDITIONAL PROJECTS

- **Salary Analysis & Tax Calculator:** Streamlit app for gross/net income, tax deductions, holiday pay, and monthly earnings tracking (Python, Pandas). [Live app](#)
- **CO2 Emissions Forecasting (Energy Sector):** group MLOps project predicting energy-sector emissions; focus on model training, evaluation, and deployment (Python, Scikit-learn, Streamlit).
- **Customer Service Chatbot:** NLP chatbot for order status, payment confirmation, and refund-policy support (Python, Ollama, LangChain, SentenceTransformers, Streamlit).

VOLUNTEERING & LEADERSHIP

- **Volunteer:** Cross-Cultural Trainers (CCT) & International Cultural Youth Exchange (ICYE), Denmark: Community and intercultural engagement (2025 - present)
- **Buddy, International Buddy Program:** Aalborg University, supported international students adapting to university life, Sep 2025 - Feb 2026. [Certificate](#)
- **Student leadership:** General Secretary, MIS Hub 71; Organizing Secretary, MIS Debating Club; Head, MIS Cultural Wing.
